

Installation and Technical Guide

To install ChartEngine for Excel, follow the steps below:

1. Check Excel Macro Settings
2. Extract the ChartEngine.zip package and Unblock the Add-in
3. Add the add-in folder to a Trusted Location
4. Install the add-in

How to Install an Excel Add-in:

<https://chartengine.io/videos/>

1. Excel Macro Settings

Macros can add extra functionality to Excel, but people with bad intentions often use them to distribute malware to unsuspecting victims.

What should I do now? To unblock macros, use the following setup:

File -> Options -> Trust Center -> Macro Settings

We (**Visual Analytics Ltd.**) ensure you that our add-in does not create temporary files, send data over the internet, or run any harmful code.

2. Extract the ChartEngine.zip package and Unblock the Add-in

Extract the downloaded zip package (ChartEngine.zip) into your Documents folder.

Optional step: Right-click on the ChartEngine.xlam and choose Properties. If this warning appears, check the Unblock checkbox.

3. Store the Add-in in a Trusted Location

A recent Microsoft Office security update has caused add-in **Ribbon Menu Bars to disappear when Excel is opened**. The best solution to this problem is to store the add-in file in a Trusted Location. A Trusted Location is a folder on your hard drive or server that has been added to the Trusted Locations list in Excel.

You probably have a ChartEngine folder in your selected folder. **You can add this folder to the trusted locations list.**

Open the Trusted Locations menu:
Choose File > Options

Trust Center > Trust Center Settings.

Excel Options

Modify...

☐ Allow Trusted Locations on my network (not recommended)

☐ Disable all Trusted Locations

OK

Cancel

Click **Browse**

Navigate to the folder that contains your add-in files and press OK.

Next, click the “**Subfolders of this location are also trusted**” checkbox.

Press OK, then press OK again on the Trust Center Window - Finally, close and re-open Excel.

The Default AddIns Folder Needs to be Trusted

The following path is the default location where add-ins are stored on the computer:

C:\Users\your_username\AppData\Roaming\Microsoft\AddIns

If you store add-ins in this default AddIns folder, you must add them to the Trusted Locations list. For most users, it is not trusted by default.

4. Install the add-in

Start Excel to begin the installation. First, if it is unavailable, you must enable the **Developer Tab**. Click File -> Options. A new window will appear.

Select the Customize Ribbon option, and ensure the Developer Tab is checked. Click OK.

The **Developer Tab** is installed.

Click **Excel Add-ins** under the Add-Ins Group. The Add-ins dialog box appears. Click Browse.

The add-in is located on your computer and can be installed or activated by clicking Browse (in the Add-Ins dialog box) to locate the add-in. Use the ChartEngine.xlam file for Excel 2016, Excel 2019, and Office 365 (Microsoft 365)

Select the checkbox in the „Add-Ins available box” and click OK.

Now, ChartEngine is ready to use!

Important

Starting from version 12.8, a new data-processing and chart-rendering module - faster than any previous one - has been added to the add-in. The ChartEngine.dll file must be located in the same folder as the ChartEngine.xlam file.
